PROFESSIONAL SUMMARY

Generative AI Engineer with 4+ years of experience designing, developing, and deploying enterprise-scale LLM applications, Retrieval-Augmented Generation (RAG) platforms, Conversational AI solutions, and Voice AI systems. Skilled in Azure OpenAI, LangChain, LangGraph, FastAPI, Azure AI Search, Vector Databases, and AI Avatar technologies. Proven track record of improving retrieval accuracy by 50%, reducing chatbot failure rates by 25%, and delivering low-latency AI solutions for global enterprise clients including Pfizer.

TECHNICAL SKILLS

Generative AI & LLMs: GPT-4, Azure OpenAI, LangChain, LangGraph, Agentic AI, RAG, Prompt Engineering, Prompt Evaluation, Multi-Agent Systems

Vector Search & Retrieval: Azure AI Search, FAISS, Pinecone, ChromaDB, Weaviate, Semantic Search, Embeddings, Reranking

Voice AI: Azure Speech Services, ElevenLabs, Speech-to-Text (STT), Text-to-Speech (TTS), Streaming Audio Pipelines, Lip Sync

Backend Development: Python, FastAPI, REST APIs, WebSockets, Swagger, Postman

Cloud & DevOps: Microsoft Azure, AKS, Kubernetes, Docker, Azure DevOps, GitHub Actions, CI/CD

LLMOps: MLflow, Monitoring, Observability, Model Tracking, Prompt Evaluation

AI Avatars & Engines: Unity 3D, Unreal Engine 5, MetaHuman, Ready Player Me, SALSA LipSync, Mixamo

Tools & Methodology: Git, GitHub, Jira, Agile, Scrum

PROFESSIONAL EXPERIENCE

AI Engineer

Dec 2021 – Present

Ascendion | Bangalore, India

- Designed and delivered enterprise-grade Generative AI, Voice AI, and RAG solutions for global clients including Pfizer.
 - Built scalable RAG platforms using Azure OpenAI, Azure AI Search, FAISS, and LangChain, improving answer relevance by 40–50%.
 - Developed real-time conversational AI pipelines using Azure Speech Services, GPT-4, FastAPI, and WebSockets with sub-300ms latency.
 - Reduced chatbot failure rates by 25% through intelligent retry mechanisms, fallback strategies, and robust error handling.
 - Implemented LLMOps practices including monitoring, prompt evaluation, model tracking, and observability using MLflow.
 - Built AI Avatar applications in Unity 3D and Unreal Engine 5 with real-time speech interaction and lip-sync animation.
 - Designed agentic AI workflows using LangChain and LangGraph for multi-step reasoning and tool orchestration.
 - Managed API development, testing, deployment, and CI/CD pipelines using Azure DevOps and GitHub Actions.
-

KEY PROJECTS

Enterprise RAG Platform – Pfizer

Tech Stack: *Python, FastAPI, Azure OpenAI, Azure AI Search, FAISS, LangChain*

- Built enterprise knowledge search platform supporting semantic retrieval and natural language question answering across Pfizer documentation.
- Automated document ingestion, chunking, embedding generation, and indexing pipelines, eliminating manual knowledge-base curation.
- Improved answer accuracy by 40–50% through retrieval optimization, reranking, and prompt engineering.

Real-Time MetaHuman AI Meeting Assistant

Tech Stack: *Unreal Engine 5, Azure Speech, GPT-4, ElevenLabs, FastAPI, WebSockets*

- Deployed AI-powered virtual assistant capable of joining Zoom and Microsoft Teams meetings with live voice and visual presence.
- Built real-time streaming pipeline: Azure Speech STT → GPT-4 inference → ElevenLabs TTS → MetaHuman phoneme-driven facial animation.
- Achieved sub-second end-to-end response latency in production using WebSocket-based streaming architecture.

Voice AI Avatar Chatbot

Tech Stack: *Unity 3D, Azure OpenAI, Azure Speech Services, FastAPI, SALSA LipSync*

- Built interactive conversational AI avatar with real-time voice recognition, GPT-4 multi-turn dialogue, and phoneme-accurate lip-sync.
- Integrated Ready Player Me avatars, Mixamo animations, and SALSA LipSync for an immersive AI communication experience.
- Developed full Unity frontend layer handling audio capture, streaming API calls, and animation state management.

AI HR Induction Assistant

Tech Stack: *Azure OpenAI, LangChain, FAISS, Unity, FastAPI*

- Built voice-enabled RAG onboarding assistant enabling employees to query HR policies via natural language.
- Reduced onboarding support volume and improved new-hire productivity through automated document retrieval and conversational AI.

EDUCATION

Bachelor of Engineering – Computer Science

2020

VTU University, Karnataka, India

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) – Microsoft
- Microsoft Azure AI Engineer Associate (AI-102) – In Progress

AWARDS & RECOGNITION

- Circle Champion Award – Recognised for outstanding contribution to enterprise AI initiatives and client delivery excellence at Ascendion.
- Rookie Star Award – Awarded for exceptional early performance and rapid ramp-up on complex AI projects.
